## Notice of Resuming Shipments of ROBOCUT Products (FANUC's wire electrical discharge machine)

As described in the "Notice of Resuming Shipments of ROBOCUT Products (FANUC's wire electrical discharge machine)" dated July 29, 2024, we resumed the shipments of the ROBOCUT models  $\alpha$ -C400iC and  $\alpha$ -C600iC for Europe.

We have recently confirmed that the remaining current model  $\alpha$ -C800iC for Europe, the shipments of which had also been suspended, is within the limits which satisfy the harmonized standards based on the European EMC Directive by taking certain countermeasures. Since, a Certificate of Conformity was issued on August 27 from a recognized European standards organization, we are pleased to announce that shipments of ROBOCUT model  $\alpha$ -C800iC, implemented with the relevant countermeasures for the European market, will be resumed.

The Special Investigation Committee is continuing to investigate this suspicion, determine the cause, and consider measures to prevent recurrence, after which a report shall be compiled. This report from the Special Investigation Committee will be disclosed upon receipt, and actions shall be continued to be taken as necessary.

Again, we sincerely apologize to our customers and all other stakeholders for any concern or inconvenience caused by this matter.
